

AI Internship – DecodeLabs

This repository contains the tasks, projects, and assignments completed during my AI Internship at [DecodeLabs](https://www.decode labs.org?utm_source=chatgpt.com).

🧑 Intern Details

- **Role:** AI Intern
- **Organization:** [DecodeLabs](https://www.decode labs.org?utm_source=chatgpt.com)
- **Internship Domain:** Artificial Intelligence and Machine Learning
- **Duration:** May 2026 – Present

📌 About the Internship

During this internship, I am working on practical projects related to:

- Python Programming
- Artificial Intelligence
- Machine Learning
- Natural Language Processing (NLP)
- Generative AI
- Git and GitHub

The internship focuses on building real-world AI applications and improving problem-solving skills.

📅 Weekly Tasks

✅ Week 1: Mini Chatbot Project

📖 Project Description

In Week 1, I developed a simple chatbot using Python. The chatbot interacts with users by responding to predefined questions and simulates a basic conversational assistant.

🎯 Objectives

- Understand chatbot fundamentals
- Use conditional statements in Python
- Accept user input and generate responses
- Build a basic conversational application

🛠️ Technologies Used

- Python 3
- Git
- GitHub

🚀 Features

- Greets the user
- Responds to common questions
- Provides simple conversational replies
- Runs in the command line
